## VISION :

Delight our customers through innovation and technology; achieve inclusive and sustainable growth to remain eminent in all over businesses.

## OUR OPERATIONS :

AIO Textile Operation involves making of fabric which involves the following steps: -

Yarn formation through raw material PET chips by the process of spinning. It will be converted into the yarn filament or spun form. Then the yarn will go to the weaving or knitting department for the fabric manufacturing. The fabric will go to the process or dyeing house output of coloured or dyed cloth/fabric as per the customer requirement. Then the finishing of the fabric is done by the means of chemical or mechanical process to improve the fn. Properties of the desired fabric like softness, lustreless etc. Packing of the finished goods (fabric) is done. Dispatching of the goods as per the requirement of the garmenter. Then the stitching of the fabric is done in garment house. Then printing on the fabric is done according to the designs through different mechanisms as per the end consumer requirement.

## Youth Size Guide

The below size chart is a To Fit guideline for the following

Technical T-shirt, Cycle Jersey and Rugby Jersey. Please note the below are approximate garment measurements and are not To Fit measurements.

SIZE	CHEST (cm)
YXS	77-79
YS	83-85
YM	87-89
YL	92-94

## Measurement Tips:

**1. CHEST:** Measure around the largest part of your chest. Be sure not to pull the measuring tape too taut.

**2. BUST:** Measure around the fullest part of the bust, across your shoulders blades.

**3. WAIST:** Measure around your natural waistline and ensure the measuring tape is taut.

**4. HIP:** Stand with your feet together and measure around the widest part of your hips. Ensure measuring tape is taut.

Please note the above measurements are body measurements (excluding Youth sizes). The fit of our garments depends on the cut, fabric and the style of the garment therefore the above size charts are just a guide and all measurements are approximate.

## What is sublimation printing?

The way **AIO** sports can print such awesome designs on jerseys is due to a process referred to sublimation printing. Sublimation printing allows you to let your imagination run wild. If it can be designed, it can be printed. It is the process of tying the dye to a fabric using heat transfer technology.

This process is where a substance moves from a solid to a gas state without being in liquid form. A digital printer produces mirrored images on paper that has been specially coated with a transfer material to protect the ink from UV rays and also keeps it water resistant. Sublimation printing is usually done for the sports wear and active wear segment using polyester materials but there are other applications for this too. Eventually the result is where the colours stand out to give you a deep and rich feel on your garment.

## Should We Custom Design Our Team Jersey?

We suggest from our experience that the jersey brings out team identity. Whether it is just the colours to make the logo stand out or subtlety in design, bringing out the identity adds to team morale. When something a team is proud of they will wear that jersey apart from just at the game. How your player represents your team is also a good way to attract new players and talent. Team identity gives rise to team bonding on and off the field. The jersey becomes a part of the team story and if the journey is to something great then it becomes part of the team legacy.
